

Assessment 3: Leadership Style Analysis and AI-Assisted Critique

[Student GenA.I. Use Integrated]

Part 1: AI-Generated Leadership Analysis

1. Use a generative AI tool (e.g., Copilot) to produce a 500-word analysis of how autocratic, democratic, and laissez-faire leadership styles impact employee motivation and productivity in a tech startup environment.
2. Include the exact prompt you used and the unedited AI output in your submission.

Part 2: Critical Evaluation and Enhancement (1000 words)

1. Evaluate the AI-generated content:
 - Identify any biases, oversimplifications, or inaccuracies in the AI's analysis.
 - Assess the AI's understanding of how organizational context (tech startup) influences leadership effectiveness.
2. Enhance the analysis:
 - Provide additional insights or nuances missing from the AI-generated content.
 - Incorporate real-world examples or case studies to support or counter the AI's points.
 - Discuss how cultural diversity within the tech startup might influence the impact of different leadership styles.

Part 3: Reflection on AI Use in Leadership Analysis (500 words)

1. Reflect on the strengths and limitations of using AI for leadership analysis.
2. Discuss how leaders in organizations might effectively use AI tools while avoiding potential pitfalls.
3. Propose guidelines for the ethical use of AI in leadership decision-making processes.

Submission: Compile all parts into a single document and upload it to Brightspace by the due date. Be prepared to discuss your findings in class.
